

Concert

Karma Nesci's concert is kind of a journey, wherein one experiences a flow of different songs, sounds and genres. Folk, indie, bossa nova, experimental, rock and medicine music come together at various points during the journey, as well as his Tibetan bowl, wind chimes and kalimba.

He plays songs from his recently released album *Contemporary Landscapes*, new numbers yet to be recorded and a few of his favourite covers.

Soothing, mesmerising and dreamy are some of the words used to describe his music.
